LETTER OF RECOMMENDATION

I am pleased to recommend Ms. Kasanagottu Yashaswini to the master's program offered at your institution. I have taken up and "C" subject. Through my observation, I would like to say that she is diligent, attentive and she thirst for knowledge never quenched.

In all my classes, she has been an active participant in classroom discussions. She has always submitted her assignments and project reports well before deadlines and she is well focused with a keen interest in the practical application of the subject. Her thought of relating everything taught in class with the practical situations happening every day has strengthened her base. So, her knowledge of the subjects of dynamics is extremely thorough.

She has done her mini project on "Census Income Prediction" and major project on "Analysis of Smart helmets and Designing an IoT based smart helmet A cost effective solution for Riders". She obediently abided by every instruction given by me during this course. Her ability to best apply her core fundamental in the real-time domain is remarkable. As her professor, I can assure she will have the same curiosity and interest for any task in hand and her innate ability to work towards perfection is definitely praiseworthy.

Considering her motivation, determination and intelligence, I strongly believe that she will scale the highest peaks in her fields of interest. In view of all the above facts, I strongly recommend Ms. Kasanagottu Yashaswini for admission into your university for graduate program. She will do well in this course and will blend well into the new environment. Hence, I strongly recommend her for admission to your university.
